PEST CONTROL NOTICE
COCKROACH PREPARATION & TREATMENT

Your home is scheduled for service on:

Date & Time: _____

We use modern, EPA-registered products applied safely in accordance with label directions via spot or crack & crevice applications. Full cooperation is mandatory for a successful treatment. If applicable, failure to prepare or allow service may result in a fee from your management.
Note: Follow-up services may be scheduled every 7–14 days based on activity levels.

PREPARATION REQUIREMENTS

Kitchen & Bathrooms: Empty all cabinets, drawers, and pantries completely. Place all dishes, cookware, utensils, and food on a table and cover securely with a clean sheet or plastic wrap. Remove the drawer from under the stove.

Sanitation: Clean all counter-tops, appliances, and floors. Remove all crumbs, grease, and standing water, as these interfere with professional treatment.

Floor Access: Pull furniture and major appliances 12 inches away from walls. Clear all toys, loose items, and clutter from floors, then vacuum thoroughly.

Pet Safety: Remove all pets from the home or secure them in a non-treatment area. Cover fish tanks and turn off their air pumps.

VACANCY & RE-ENTRY RULES

Mandatory Vacancy: The home must be completely vacant during service. Residents and pets must remain out for at least 3 hours to allow products to dry.

Avoid DIY Products: Do not use over-the-counter sprays, baits, or foggers. These contaminate professional treatments and cause them to fail.

Maintenance: Keep all food sealed in airtight containers and remove trash daily to prevent re-infestation.

Thank you for your cooperation!
